*What the Application is: * The online platform for booking hotels, dorms, apartments, and private rooms is a web application that aims to make it easier for travelers and students alike to find and book accommodations in Turkish Republic of Northern Cyprus .

Note: this is a homework so at payment stage user will enter dummy info and application will only enter payment entries to a table to see them admin's side.

Like:

purchases:

userid	payment amount	roomid
--------	----------------	--------

123	9000	630
-----	------	-----
